

Northeastern Technical College's Division of Continuing Education Presents:

Creativity and Problem Solving

No Man is an Island

March 9

9:00 am – 12:00 pm

NETC Cheraw – Room 212

Cost: \$49.00

Learn the practical tools of problem solving and how to be a creative thinker. This is not an academic workshop...it is real life applications that focus on sharing ideas, people and books about how to make things better! Presenter, Jack Dearing, will help you understand the difference between creativity and problem solving and when to apply each to everyday situations.

Some days you might need to fix something. Some days you might need to create something new. But SOME DAYS you might need to create something new in order to fix something!

This workshop will help you identify the resources and tools to help you make the decision between fixing something or creating something new.
