

Northeastern Technical College

Federal Work-Study Application

Award Year: 2007 - 2008

The Federal Work-Study Program provides jobs for undergraduate and graduate students demonstrating financial need. Work-study jobs at NETC allow a student to work on campus part-time. Eligible students may work an average of 10 to 20 hours per week. Based on funding, we are able to employ approximately 24 students.

The Financial Aid Office's staff does not select Work-study students for other areas of employment. The supervisor, of a set position, will review applications and may select two or three people to interview. After interviewing each applicant selected, the supervisor will select a replacement and the Office of Student Financial Assistance will do the paperwork so that the student can begin work. All work-study students are paid minimum wage.

Date: _____

Name: _____

Address: _____

Telephone Number: _____

Skills:

Can you type? If so, how many words per minute? _____

What computer software program(s) do you know how to use?

Any other skills: _____
